TECHNICAL SKILLS

- **Programming Languages:** Python, SQL, MATLAB, R, DAX, Visual Basic
- **Software:** Git, Azure DevOps, Microsoft Excel, Power BI, Tableau, Smartsheet, Microsoft Office, Alteryx

PROJECTS

QSC Schedule Cruncher, <https://github.com/mariahlandes/qsc-schedule-cruncher> December 2024

- Built an automated Python system (Pandas, NumPy, OpenPyXL) to process tutor schedules and course coverage data from Excel files.
- Transformed raw data into structured outputs that fed the school website, displaying tutor availability by course and time to help students easily find support.

ESD School Enjoyment, public.tableau.com/views/ESDSchoolEnjoyment/FinalProject June 2023

- Analyzed survey data to assess school enjoyment using Excel and Tableau. Cleaned raw data, performed exploratory analysis, and built interactive dashboards to uncover trends and provide actionable insights.

EDUCATION

Master of Science in Information Management, Specialization in Data Science December 2025

University of Washington, GPA: 3.98

- Relevant Coursework: Data Science I, Machine Learning, Foundations of AI, Data Science III: Scaling & Applications, Data Driven Problem Solving, Policy & Ethics in IM

Bachelor of Science in Mathematics December 2023

University of Washington Bothell, GPA: 3.61

- Four-Time Dean's List Honoree: Spring 2022, Winter 2023 - Fall 2023
- Relevant Coursework: Statistics, Nonlinear Optimization, Advanced Linear Algebra, Data Visualization

EXPERIENCE

Graduate Business Intelligence Analyst Intern, Port of Seattle April 2025 – Present

- Lead development of a high-visibility executive Tableau dashboard for airport operational performance, defining and implementing previously unsolved KPIs using LOD expressions and complex SQL queries to ensure data integrity.
- Serve as the team's primary Python resource, modernizing analytics workflows by migrating legacy Alteryx processes to Python pipelines with API ingestion, validation logic, and preparation for future automation.
- Improved passenger volume forecasting capabilities, extending reliable predictions from 2 months to 12+ months, through time-series modeling, feature engineering, and systematic model evaluation.
- Design and document end-to-end analytical solutions processing 800k+ records, delivering predictive models and interactive dashboards using Python, Tableau, SQL, R, Alteryx, and Git.

Lead Math Tutor, University of Washington Bothell September 2022 – April 2025

- Communicated technical concepts to non-technical audiences and diverse groups of people.
- Fostered student learning through engaging questioning techniques.
- Revisited and strengthened proficiency in mathematical topics.

Marketing Data Analyst, Eastside Exterminators June 2024 – September 2024

- Developed and implemented 15 interactive reports and dashboards using Power BI and Excel, which enhanced the visualization of key performance indicators (KPIs) and improved decision-making processes for the marketing and leadership teams.
- Conducted statistical analyses on marketing data, identifying key trends and patterns to improve campaign ROI.
- Designed and executed a data validation system using Smartsheet, which reduced data discrepancies by 50% and ensured the integrity of marketing data.
- Collected and synthesized data from 20 distinct sources, including CRM systems and social media platforms, to create comprehensive reports that provided actionable insights and supported strategic marketing decisions.
